### Ligature Resistant Faucet

**The Ligature Resistant Faucet** is designed and developed to retrofit existing lavatories or it can be specified for new design. The Ligature Resistant Faucet is arranged to be mounted to the deck of the lavatory. Faucet assembly requires (3) 1-5/16" to 1-1/2" diameter holes on 4" or optional 8" centerset. Conical faucet is chrome plated brass and provides vandal and suicide resistance.

**Valve** is an Air-Control pneumatically operated, pushbutton valve using atmospheric air. Hemispherical pushbuttons are vandal-resistant and require less than 5 pounds of force to activate valve. Valve is metering with non-hold open feature. Metering valve timing range is 0-60 seconds. Valve includes a 0.7 GPM flow control and can be remotely located up to 10 feet from the operating pushbutton.

**Optional** -MXTP Mixing Valve option delivers tempered water flow by compensating for pressure and temperature fluctuations. Valve is to be field set to 105 Fahrenheit and includes strainers and integral checks. Operating range is 30 to 100 psi.

**Fixture is ADA Compliant.** Unit conforms with ADA requirements for accessibility when installed correctly. Compliance is subject to the interpretation and requirements of the local code authority.

### GUIDE SPECIFICATION
