4101-PDM

Fixture May Show Some Available Options

**Surgical Scrub Sink** is designed for use in health care institutions providing surgeons with a convenient sink for pre-op scrub up.

**Fixture** is fabricated from heavy gage, type 304 stainless steel and is seamless welded construction polished to a satin finish. The cabinet interior is sound-deadened with a fire-resistant material.

**Fixture Mounting:** Scrub Sink unit is designed to be wall hung or supported on the floor. Specify optional -MC Wall Mounted Support Carrier or -PB Stainless Steel Pedestal Base for Floor mounting. (-MC Mounting Carrier requires appropriate wall depth to accommodate.)

**Scrub Sink** is provided with front panels which are easily removed for access to the water control valve and waste connection. Scrub sink has a sloping bottom surface to minimize splashing and a 1-1/2" OD tailpiece with a 3" flat strainer drain.

**Backsplash** has a gooseneck spout assembly with a 1-1/2" sprayhead that can be removed for sterilization. Spout outlet does not project directly into flat strainer drain.

**T/P Temperature/Pressure Balancing Mixing Valve Control** is located on the control panel and maintains a constant water temperature with a flow control of 2.5 GPM. This easily adjustable, anti-scald valve will automatically shut off if the hot or cold water supply fails. Valve is equipped with internal check stops for servicing and to prevent backflow.

**Water Supply Valve** is a mechanical pilot type, actuated by one depression of a knee-operated front panel and turned off by a second depression. Optional -ETC Electronic Timing Controller or -SO Sensor Operation available in lieu of Knee Operation.

**Optional -EFW Eye/Face Wash** provides a Safety Manufacturing™ Model S0660 Series Swing Down Eye-Face Wash within Sink Trough and includes Factory installed Controls® Model ET71-1-BVS-OTG Safety Mixing Valve with Temperature Gauge and Stop Valves.

**Models with -EFW Option** comply with USP 800, Section 5.3 Eyewash Station Requirements.
