Hand Washing/Infection Prevention

Bariatric Sinks
Ligature Resistant Sinks
Infection Prevention Sinks
Scrub Sinks
ADA Sinks 

Whitehall Manufacturing
Manufacturer of Healthcare and Rehabilitation Products since 1946

The complete line of sinks to fulfill all healthcare infection needs.

Bariatric Sinks

Bariatric Sinks

Our bariatric sink is constructed of high grade stainless steel and is finished with EnviroGlaze®, an aesthetic powder coat which complements our bariatric toilet & BestCare® ligature resistant line. This sink can withstand a load of up to 1,000 pounds, is impact resistant and meets all ADA compliance requirements. Originally designed for our BestCare® ligature resistant line, the bariatric sink is also ideal for all other healthcare applications.

Ligature Resistant Sinks

BestCare™

Whitehall's ligature resistant sink is constructed of either solid surface material or high grade powder coated stainless steel. It comes standard with tamper resistant screws and a bottom shroud which covers the P-trap and valve, maximizing safety & ligature resistance.

Available in:

- Stainless Steel
- Solid Surface

Faucet Activation

Infection Prevention Sinks

This Infection Prevention sink is made of cast solid-surface material that has been infused with SteriTouch®, which reduces the growth of harmful bacteria and mold. Offset drain prevents water from being dispensed directly into the drain, preventing bacteria in the drain from entering the sink basin via splashing.

- Internal slope defuses water flow, minimizing splash.
- Thin outside rim is angled downward to discourage users from placing objects on it, reducing bacteria.
- Can scrub up to the elbow
- Front contour fits the body contour better during hand washing.

SteriTouch
ANTIMICROBIAL PROTECTION

AVAILABLE WITH STANDARD OR  ADA DESIGN

Handwashing is one of the most powerful tools in the fight against the spread of infection.

It is estimated that 100,000 people die from hospital-acquired infections each year. According to the United Nations Health Agency, hundreds of millions of infection could be prevented if health-care professionals, patients and their families, wash their hands with alcohol-based rub or soap and water before and after touching patients and their surroundings. When done regularly by food handlers, handwashing can also prevent the spread of food borne illness. Whitehall's Infection Prevention Sink has features that assist healthcare workers, patients, and food handlers with proper handwashing and reduce the spread of bacteria.

Stainless Steel Surgical Scrub Sinks

SCRUB-WARE®

Whitehall's stainless steel surgical scrub sinks are designed and engineered to be durable, easy to maintain and convenient to use. Scrub sinks are available in single, double or triple station configurations. Can be modified to fit the needs of the facility and end user, including ADA compliance.

Some Available Options:

- Eyewash
- Storage shelf
- Timing device
- Soap flushing system

Compact one bay with eye wash

Two bay standard

- Manufactured from heavy gage stainless steel
- Gooseneck faucet and spray head that can be removed for sterilization
- Constructed with seamless welds which minimize surface areas where bacteria can collect
- Off set drains for reduced infection
