Wall Mounted Stainless Steel Bariatric Toilets

Although these fixtures look like porcelain, they are actually made out of stainless steel. Stainless steel fixtures are proven to be a cost-effective and more durable alternative to vitreous china toilets, especially in hospitals. Where damage to vitreous china can create a razor-sharp hazard to patients, these stainless steel bariatric toilets are built to comply with the special needs of both bariatric patients and facilities. The results are fewer safety risks and improved patient comfort and caretaker confidence.

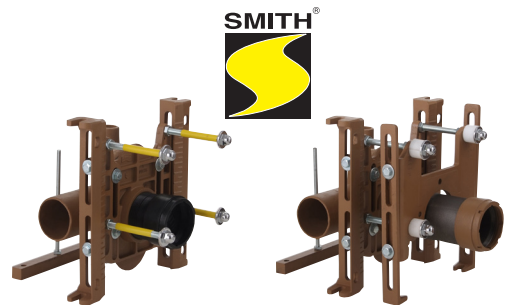

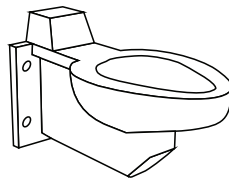

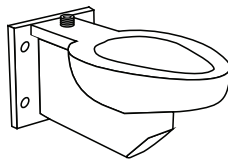

Off-floor Bariatric Toilet

- Off floor mounted allowing easy mop access for cleaning
- Test weight capacity **750 to 1,000 lbs** depending on toilet carrier
- Sturdy stainless steel construction
- Available with EnviroGlaze® powder-coat paint (as shown)
- Water Savings! Can accommodate **1.28 GPF, 1.6 GPF, or 3.5 GPF flushometers** - no modifications required.

Floor Mounted Stainless Steel Bariatric Toilet

This fixture is specially designed with the comfort of bariatric patients in mind. The large surface area of this high-capacity stainless steel toilet helps facilitate patient balance and in turn provides for better care giver control. To further enhance the ergonomics of this toilet, an optional Big John® toilet seat is available on all models.

On-floor Bariatric Toilet*

- Highest test-weight capacity of up to 5,000 lbs.
- Large surface area helps facilitate better patient balance
- Ergonomically created with bariatric patients in mind
- ADA compliant with HSBJ toilet seat and additional ADA considerations
